Carpe

In Carpe we design and implement projects to transform cities and make them more human. For that purpose, we create spaces for innovation and collaboration where people are not just spectators, but an active part of the solution.

We work for a wide range of agents: companies, public administrations, innovative labs, NGOs and educational centres.

We are delighted to participate in conferences, meetings and networks where we can openly share knowledge in order to connect with new professionals, interests and approaches that enable us to grow. We are part of CivicWise, Red de Técnicas de Covivienda, La Masovera, Colaboratorio IC, FEVECTA and Missions Valencia 2030.

We are Aitor Deza, Maje Reig, Irene Reig, Brenda Alós and Celia de Llanos. We have been creating and experimenting with new methods of collaborative work for the last 10 years.

We work with the commitment to cooperative values.

We provide services in any of these processes:

- Design
  Of any device or space that contributes to inhabit more livable, sustainable and inclusive future. That allows interaction with citizens, solves a use or facilitates everyday actions.

- Co-creation
  Through strategies and actions that allow us to pool ideas and work collaboratively. To collectively improve the spaces we inhabit, from design to materialisation.

- Innovation
  Around experimental projects that we design, implement and evaluate. At multiple levels and with different actors: citizens, administration, companies, etc.
